

BURNT FORK-BIRCH CREEK DISTRIBUTION SYSTEM

1960 ASSESSMENT

** \$270.00 **

BASIS OF ASSESSMENT

This assessment is prepared under the following authority:

- 1- Article XII, paragraph(h); Upper Colorado River Basin Compact.
- 2- Mutual Letters of Agreement(1960) between the State Engineer of Utah and the State Engineer of Wyoming.
- 3- Water user's annual meeting held in Manila, Utah on March 10, 1960 in the Courthouse at 6 p.m. and the authority of the Utah State Statutes.

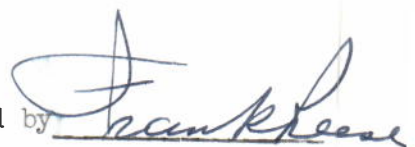

CALCULATION OF ASSESSMENT

From records of the State Engineer(see 1958 Formula) it is determined that there is 2,292.12 irrigated acres of land using such water diverted in Utah and therefore \$270.00 divided by 2,292.12 acres of land equals \$0.1177948799 cost for one acre of land as the pro-rata share of each such listed Utah Water User.

PROOF

2,292.12 times \$0.1177948799 equals \$270.00
